

Part 1

Task 1.1
Automatic newspaper analysis
(structure and design extraction)

Task 1.2
Understanding reading behaviour
(from gaze behaviour to scanpath prediction)

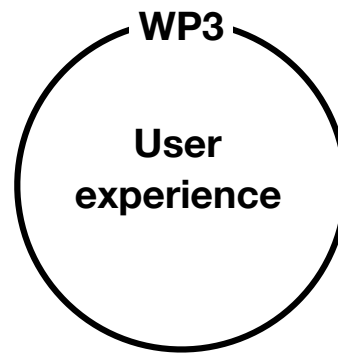

Part 2

Task 2.1
Redesigning as a packing problem

Task 2.2
Processing images for a better impact
(enhancements, tone-mapping, cropping)

Task 2.2
Integration of personalised Ads in the new design

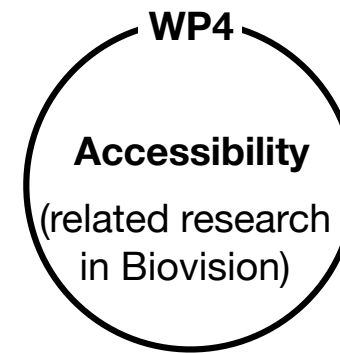

Task 3.1
Ergonomics: navigation tools

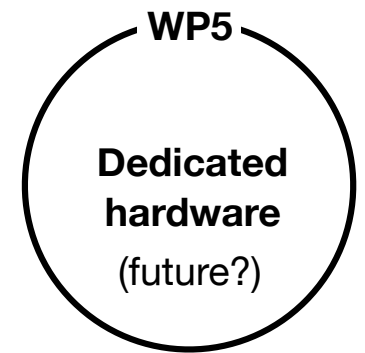

Task 3.2
Enriching static content with live news
(related news content, flight info)

Task 3.2
Personalization of reading content
(reformatting depending on user preferences)

Task 3.4
News on phones screens
(novel ideas from scanpath)

Task 4.1
Improving reading comfort through image enhancements
(enhancements and pre-compensation methods)

Task 5.1
Building a minimal hardware for e-newspapers
(light weight, flexible?)

Legend

Essential for our solution

Very difficult problem. No or little existing solutions

Preliminary work done or existing, but not solved

Existing solutions in the state-of-the art that may be sufficient

Technical contribution with business side in mind
